Xasanjon Abdunabiyev
Frontend Developper

✉ techcoder444@gmail.com ☎ (97)-538-40-75 🌐 *www.xasanjon-portfolio.com*

With over **2** years of experience in frontend development, I specialize in building high-performance web applications using NextJS and ReactJS. My projects have consistently improved productivity and user satisfaction. I have been teaching since 2023 and have pedagogical potential.

Experience

Albison Academy *May 2022 - Aug 2024*

- After successfully completing the **Zero to FullStack** course at Albison Academy, I started teaching at this academy. In the beginning, I started teaching as an assistant coach or assistant counselor, and then continued in several online groups. More than **75%** of my online readers have found the job they wanted and I am very happy about that. I am currently teaching high quality web programming **bootcamp** classes.

One of my big projects

- I took my first major project at the English Language **Learning Center** and it was very important for me to put the technologies I learned into practice. Project Summary I created a dashboard and a speech test landing page to test the mocks. Currently, about 200 people are regularly using this project. See this project in detail 👉 mock-tests. **And this project gave me good income**

My collective projects at the Academy

- At the same time, I actively and regularly participate in projects with the team at the academy. Our team has more experienced programmers than me, and I get advice from them. I participate in **code review** processes to maintain high quality standards, provide constructive feedback, and ensure the application follows best practices. I also perform unit and integration testing using **Jest and React Testing Library** to ensure **code reliability** and **functionality**.
- Examples of our most successful collective projects are e-medical.uz, adminveva.com, codekaplan.com, veva.uz You can get complete information about these projects from the **portfolio**.

Education

Albison Academy *Sep 2021 - April 2022*

- Zero to fullstack course at Albison Academy

Zero To Mastery Academy

- In 2023, it's completely for web developers
- This is one of the most popular, highly rated coding bootcamps online.

Skills

- HTML, CSS, CSS frameworks extentions ,
- Advanced JavaScript & Typescript,
- Ability to write clean code based on solid principles
- Testing Skils, Unit Testing, Integration Testing
- State Menegement, Redux,

- React JS & Next JS
- Ability to understand and explain difficult concepts in programming languages
- Problems Solving
